SUMMARY

Entry-level Data and AI enthusiast with a foundation in data analysis, machine learning concepts, and AI applications, complemented by hands-on exposure to banking operations and AI data annotation. Possesses analytical thinking, attention to detail, and an understanding of fintech and banking environments. Highly motivated to learn, build, and contribute to real-world AI and data solutions. I have many personal project ideas focused on the banking sector, and if hired, I am eager to bring these ideas to reality and make meaningful impact within the organization.
